

NEAR EAST UNIVERSITY

**DEPARTMENT OF ARTIFICIAL
INTELLIGENCE ENGINEERING**

Profile of the Program

2021-2022

Profile of the Programme and Method of Education

Lectures by (teaching staff) instructor, class discussion, and individual projects are implemented as the method of education. The curriculum is planned with a multidisciplinary approach in mind. In year I, the students take courses in basic engineering and programming. In year II, courses on programming, artificial intelligent principles, and in year III, courses of artificial intelligence and software. Year IV is the elective courses period and advanced artificial intelligence that target real-life scenario and engineering problems. During this period, the students are given the opportunity to elect the courses in accordance with their academic interests besides the must courses and engineering design courses.
