

NEAR EAST UNIVERSITY

**DEPARTMENT OF Mechatronics  
Engineering**

***Qualification Requirements and  
Regulations***

2021-2022

## **Qualification Requirements**

153 Near East University Credits (Near East University Credit is contact hour based) which is a total 247 ECTS credits must be completed after being successful in the courses to become a graduate of the mechatronics engineering department.

ECTS is a credit system designed to make it easier for students to move between different countries. Since they are based on the learning achievements and workload of a course, a student can transfer their ECTS credits from one university to another so they are added up to contribute to an individual's degree programme or training. ECTS helps to make learning more student-centred.

ECTS also helps with the planning, delivery and evaluation of study programmes, and makes them more transparent

## **Converting US College Credit Hours ( semester credit hours-SCH) to ECTS**

ECTS is the most commonly used credit system in Europe. The major difference between the European Credit System ECTS and the US College Credit system is that the first is based on student workload and the second on contact hours. The ECTS is oriented towards the time required for a student to meet the intended study outcomes, while the U.S. system is more oriented towards the time a faculty member needs to teach.

A student is required to have minimum pass grade from each course and obtain minimum 2.00/4.00 cumulative Grade point Average (cumulative GPA).

The students who have successfully completed the programme should be able to be science-based, skilled and competent **engineers** prepared to meet the challenges of practicing information systems in the 21st century, and **researchers** who are prepared to conduct researches.

## **Arrangements for transfer from another Engineering department (Recognition of Prior Learning)**

A student wishing a transfer from another university: the student must prove her/his English Proficiency if s/he wishes to attend the English Section. At the time of OSS examination, the candidate's entrance score must not be less than the lowest score for admission to the Near East, Mechatronics Engineering Department. The transcript and course content of the applicant is examined by the department and the student is then accepted to the appropriate year of the programme.
